ABSTRACTED-PUB-NO: JP02062817A

BASIC-ABSTRACT: A makeup cosmetic material contains one or more wax capsules

including a skin-moisture-retaining agent. The moisture-retaining agent is

pref. one or a mixt. of water, alcohols, polyhydric alcohols, sugars and sugar

alcohols, sugar derivs., polysaccharides, amino acid, polypeptides, organic

acid salts, and water-soluble vitamins and substances having vitamin action.

The wax for the capsules is pref. one or a mixt. of beeswax, whale wax,

carnauba wax, candelilla wax, montan wax, Japan wax, ceresin, solid paraffin,

microcrystalline wax, myristic, palmitic, stearic, and behenic acid, cetanol,

stearyl alcohol, behenyl alcohol, myrisyl myristate, collesteryl stearate, a batyl stearate.

USE - For providing a compsn. with a wet and plain feeling, good affinity for the skin, and good retention.

INT-CL (IPC): A61K007/00; A61K031/70 ; A61K045/06

ABSTRACTED-PUB-NO: JP61289016A

BASIC-ABSTRACT: A new external-application agent for the skin is prep'd. by blending three or more amino acids comprising essential amino acids, glutamine, and their salts, two or more vitamins with one or more of vitamin B's included, and saccharides including glucose. The total amt. of the three constituents is 0.05-15 wt.%. The agent is used in cosmetics.

ADVANTAGE - Successive application of the cosmetics gives vividness, glossiness, smoothness, and wetness to the skin. It has the effect of preventing rough skin, esp. for women having dry skin.
